Q1 2026 Fund Commentary

Commentary and opinions are provided by Fidelity Investments Canada ULC.

Market commentary

Global equities declined during the first quarter of 2026, while fixed income markets provided modest stability. Markets shifted from expectations of interest rate cuts and earnings strength toward concerns about inflation risks, higher-for-longer rates and slowing growth. Escalating geopolitical tensions added to inflation pressures, dampened risk appetite and reshaped expectations for global growth.

Major central banks held policy rates steady during the quarter. In Europe, rising energy prices pushed annual inflation back above target in March. The U.S. economy grew at a slower pace than expected, reflecting weaker exports, household spending and investment. The U.S. Federal Reserve Board held interest rates steady for a second consecutive meeting in March. Six of eleven GICS sectors posted positive returns, led by the energy, utilities and materials sectors, while the consumer discretionary and communication services sectors were the main laggards.

Performance

A lower-than-benchmark allocation to and security selection in U.S. equities contributed to performance during the quarter. An out-of-benchmark allocation to a gold exchange-traded fund also contributed to performance, as did security selection in emerging markets equities.

At the underlying fund level, Fidelity Emerging Markets Fund and Fidelity Canadian Disciplined Equity Fund contributed to performance.

Within the fixed income allocation, a lower-than-benchmark allocation to global investment-grade bonds detracted from performance during the quarter. Credit exposures were mixed with minimal net impact, despite credit spread widening.

At the underlying fund level, Fidelity Insights Currency Neutral Fund and Fidelity International Equity detracted from performance during the quarter.

Portfolio activity

The sub-advisor increased the allocation to Canadian equities and Canadian investment-grade bonds during the quarter. The sub-advisor reduced the allocation to international equities, global investment-grade bonds and emerging markets equities.

CAN Fidelity Global Income Portfolio 75/75 (PP)

May 31, 2026

Outlook

The sub-advisor observes that global economic activity remains broadly supportive, although the conflict in the Middle East has introduced an inflation shock that has negatively affected both stocks and bonds, while commodity prices surged. Against this backdrop, the sub-advisor maintains a moderate overweight to equities, expressed primarily through an overweight to Canadian equities where valuations are attractive and commodity exposure is structurally embedded.

The sub-advisor shifted to an overweight in Canadian equities and the Canadian dollar beginning in the third quarter of 2025, reflecting Canada's position as a reliable producer of resources in an environment of heightened geopolitical uncertainty. The sub-advisor believes the period of maximum cyclical pressure is passing as interest rate reset effects fade and commodity-driven capital investment accelerates.

Within fixed income, the sub-advisor maintains an underweight duration, favouring inflation-linked and real assets over traditional investment-grade bonds. Commodities are held as a hedge against inflationary stress and a source of diversification. Currency positioning reflects a constructive view on the Canadian dollar, as the link between commodity prices and the Canadian dollar is expected to reassert itself amid diverging rate expectations.

FundGrade A+® is used with permission from Fundata Canada Inc., all rights reserved. The annual FundGrade A+® Awards are presented by Fundata Canada Inc. to recognize the "best of the best" among Canadian investment funds. The FundGrade A+® calculation is supplemental to the monthly FundGrade ratings and is calculated at the end of each calendar year. The FundGrade rating system evaluates funds based on their risk-adjusted performance, measured by Sharpe Ratio, Sortino Ratio, and Information Ratio. The score for each ratio is calculated individually, covering all time periods from 2 to 10 years. The scores are then weighted equally in calculating a monthly FundGrade. The top 10% of funds earn an A Grade; the next 20% of funds earn a B Grade; the next 40% of funds earn a C Grade; the next 20% of funds receive a D Grade; and the lowest 10% of funds receive an E Grade. To be eligible, a fund must have received a FundGrade rating every month in the previous year. The FundGrade A+® uses a GPA-style calculation, where each monthly FundGrade from "A" to "E" receives a score from 4 to 0, respectively. A fund's average score for the year determines its GPA. Any fund with a GPA of 3.5 or greater is awarded a FundGrade A+® Award. For more information, see www.FundGradeAwards.com. Although Fundata makes every effort to ensure the accuracy and reliability of the data contained herein, the accuracy is not guaranteed by Fundata.
