Q4 2025 Fund Commentary

Commentary and opinions are provided by Mackenzie Investments.

Market commentary

The global economy remained resilient in the fourth quarter despite policy uncertainty and the effects of the prolonged U.S. government shutdown. Investor sentiment improved as inflation eased across major regions and expectations grew for continued monetary and fiscal policy support into 2026. Non-U.S. markets benefited from a weaker U.S. dollar and improving valuations, while Asia and Europe saw stronger earnings momentum.

Central banks maintained or extended easing cycles. The U.S. Federal Reserve Board delivered additional rate cuts in October and December, while other major policymakers signaled that accommodative policy conditions will persist. These measures helped sustain risk appetite even as global manufacturing remained soft.

Global fixed income markets delivered modest gains in the fourth quarter as easing inflation and renewed policy support in major economies improved the backdrop for high-quality bonds. Government bonds in developed markets were supported by easing policies. Investment-grade corporate bonds outperformed government bonds in several regions as credit spreads tightened and earnings remained resilient. High-yield bonds also advanced. Credit spreads remained tight across most global markets, consistent with low default expectations and a gradually improving macroeconomic outlook.

Performance

Relative exposure to Government of South Africa (9%, 2040/01/31) contributed to the Fund's performance. South Africa saw strong momentum relative to its peers. Exposure to Government of Brazil (10%, 2027/01/01) detracted from performance. Brazilian local-currency bonds fell as investors reassessed the pace and magnitude of monetary policy easing amid ongoing fiscal uncertainty and volatility in interest rates globally.

At a sector level, exposure to South African government bonds contributed to the Fund's performance. Exposure to Brazilian government bonds detracted from performance.

Portfolio activity

A holding in Sunoco LP (3.875%, 2026/06/16) was added to the Fund to replace a holding in Parkland Corp. Sunoco is one of the largest independent fuel distributors in the Americas and a leading operator of energy infrastructure. The investment reflects the sub-advisor's positive outlook for the credit following Sunoco's announced acquisition of Parkland in a transaction valued at approximately US\$9.1 billion. The Fund's holding in Parkland (3.875%, 2026/06/16) bonds was sold given the acquisition.

A Fund holding in Government of South Africa (9%, 2040/01/31) bonds was reduced to take profits.
