Q3 2025 Fund Commentary

Market commentary

Global equities gained over the third quarter of 2025 and outperformed global bonds, which posted a small gain (all returns in Canadian-dollar terms on a total return basis). Expectations that the U.S. Federal Reserve Board (Fed) would lower interest rates and ongoing investment and development in artificial intelligence (AI) helped boost stocks over the quarter.

The U.S. equity market advanced, posting a double-digit return. Information technology was the strongest-performing sector. Canadian equities increased and outperformed U.S. equities, getting a strong performance from the materials sector. EAFE equities advanced, underperforming Canadian and U.S. equities.

Equities in Japan and the U.K. contributed to the performance of EAFE equities. Emerging markets equities also advanced and outperformed their developed market peers, with equities in China and Taiwan contributing to performance.

The FTSE Canada Universe Bond Index posted a total return of 1.5% over the quarter. As government yields moved lower, government bond prices increased. Government bonds underperformed corporate bonds, which also posted a gain.

Corporate bond prices benefited from narrowing credit spreads (the difference in yield between corporate and government bonds). Real estate bonds posted the largest increase in the corporate sector. High-yield bond prices rose on a total return basis and outperformed investment-grade corporate bonds.

Global bond yields remained largely unchanged over the quarter, and global bond prices posted a small gain. The Bank of Canada, the Fed and the Bank of England lowered their policy interest rates. The European Central Bank and Bank of Japan held their policy interest rates steady. The yield on 10-year Government of Canada bonds fell from 3.27% to 3.18%. Government yields in the U.S. also declined. Government bond yields in the U.K., Germany and Japan increased.

Performance

An allocation to Emerging Markets contributed to performance because of stock selection in the Philippines, Malaysia and China. U.S. Dividend contributed because of stock selection in the materials, communication services and financials sectors.

Allocations to Canadian Tactical Bond and Foreign Bond also contributed to performance.

Exposure to Global Growth Opportunities detracted from performance because of stock selection in the industrials, information technology, consumer discretionary and health care sectors. Exposure to International Growth detracted because of stock selection in the financials, materials and utilities sectors. Exposure to Canadian Growth also detracted from performance.

Portfolio activity

The sub-advisor did not make any changes to the Portfolio during the quarter.

CAN Advanced Allocation 75/75 (PP)

December 31, 2025

Outlook

In the sub-advisor's view, the third quarter of 2025 highlighted divergence in global growth. The U.S. economy was resilient with gross domestic product growth near 3% annualized and productivity gains driven by AI adoption offsetting softer labour market trends. In contrast, Canada, Europe and the U.K. were weighed down by rising unemployment and trade challenges.

In the sub-advisor's view, equity markets reflect investor optimism, particularly in the U.S., where AI-driven earnings drove elevated valuations. Market concentration in technology and swings in investor sentiment are causes for caution.

Within fixed income, we view alternatives such as private credit and mortgages as valuable sources of income and duration management, particularly in a higher-for-longer environment. Liquidity and flexibility remain central, allowing portfolios to absorb sudden shocks if risks around AI investment, funding markets, or fiscal policy materialize.

The sub-advisor's approach emphasizes resilience over precision. Core U.S. equity exposure remains important, but we balance this with global diversification and multi-factor strategies that reduce dependence on narrow leadership.

CAN Advanced Allocation 75/75 (PP)

December 31, 2025

*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

[^]Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

[†]Soft capped - Contributions are no longer accepted to new investors., [‡]Hard capped - Contributions are no longer accepted.

Distribution of the chart, history standard and short-term reports are not permitted without including the fund profile long-term report. A description of the key features of Canada Life's individual variable insurance contract is contained in the information folder, available from your advisor.
