

# CAN Real Return Bond 75/75 (PP)†

July 31, 2026

A Canadian fixed-income fund that provides opportunities for moderate income generation as well as longer-term inflation protection.

## Is this fund right for you?

- You want to protect your money from inflation while also protecting it from large swings in the market.
- You want to invest in Canadian real-return bonds issued by governments, with some exposure to foreign fixed-income securities.
- You're comfortable with a low to moderate level of risk.

## Q2 2026 Fund Commentary

*Commentary and opinions are provided by Canada Life.*

### Market commentary

Headline inflation in Canada began moving higher during the second quarter because of rising oil prices, although core prices remained stable at roughly 2%. Volatility in the breakeven curve (the difference between the yields of nominal bonds and inflation-indexed bonds) was low for most of the quarter. A small uptick in the front end of the breakeven curve reflected the added pressure from higher oil prices on short-term inflation expectations.

### Performance

An overweight allocation to provincial inflation-linked bonds was the largest contributor to performance. The sub-advisor has maintained this allocation because of the scarcity of the product and the additional yield it provides. Provincial inflation-linked bonds outperformed federal inflation-linked bonds over the quarter.

The underweight allocation to the Government of Canada (4.25% due 2026) also contributed to performance. This security underperformed both the federal sector and the overall index during the quarter.

Selection within provincial inflation-linked bonds detracted from performance. The sub-advisor holds an overweight allocation to Province of Quebec bonds, and these bonds underperformed the provincial inflation-linked bond sector during the quarter.

The Province of Quebec (4.25% due 2026) detracted from performance. The sub-advisor holds an overweight allocation to this security, and it underperformed the index during the quarter.

### Portfolio activity

The sub-advisor decreased positions across the curve in response to client withdrawals. As a result, provincial exposure passively increased as withdrawals were completed using the Fund's federal holdings.

### Outlook

The sub-advisor may continue to tactically manage the Fund's duration and positioning in line with its view on interest rates.

\*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

<sup>^</sup>Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

<sup>†</sup>Soft capped - Contributions are no longer accepted to new investors., <sup>‡</sup>Hard capped - Contributions are no longer accepted.
