

CAN Canadian Low Volatility 75/75 (PS2)

December 31, 2025

This segregated fund invests primarily in Canadian stocks with a focus on those companies and/or sectors that are believed to likely have lower sensitivity to broader market movements.

Is this fund right for you?

- A person who is investing for the longer term, seeking the growth potential of stocks, and is comfortable with moderate risk.
- Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

Q3 2025 Fund Commentary

Market commentary

Canada's economy faced challenges in the third quarter as trade tensions with the U.S. continued. This weighed on trade activity and the manufacturing sector. Household spending demonstrated resiliency despite a slowing labour market and economic uncertainty.

The Bank of Canada (BoC) lowered its key interest rate to 2.50%, citing a weaker labour market and easing inflation. The BoC emphasized a cautious approach to balancing growth and price stability. Canada's unemployment rate was 7.1%, the highest since 2021, with youth unemployment rising sharply.

The Canadian equity market posted strong gains, with the S&P/TSX Composite Index rising 12.5%. Materials, information technology, energy and financials outperformed. The energy sector performed largely in line with the market, challenged by lower oil prices and trade-related issues.

Performance

The Fund's overweight exposure to Avino Silver & Gold Mines Ltd., OceanaGold Corp. and SSR Mining Inc. contributed to performance. Avino reported strong results in September, driven by growth and quality factors. A lack of exposure to Great-West Lifeco Inc. and Power Corp. of Canada detracted from the Fund's performance. An underweight exposure to Barrick Mining Corp. also detracted from performance.

At the sector level, stock selection within materials and among growth factor stocks contributed to the Fund's performance. Overweight exposure to materials and exposure to volatility stocks also contributed to performance. Stock selection within financials detracted from performance.

Portfolio activity

Portfolio activity is an outcome of the sub-advisor's stock selection, optimization and vetting process, which runs on a daily basis.

December 31, 2025

*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

^Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

†Soft capped - Contributions are no longer accepted to new investors., ‡Hard capped - Contributions are no longer accepted.

Distribution of the chart, history standard and short-term reports are not permitted without including the fund profile long-term report.
